Davide Imola

Tech Lead · Speaker · Open Source Builder

Tech Lead at RedCarbon: technical direction across the platform, and the AI agents that run on it. Ten years of DevOps and platform engineering behind that (Go, Kubernetes, GitOps, DDD). I work where AI does real security work, and where the code AI writes has to be secured. Co-founder of Schrodinger Hat, co-organizer of Open Source Day.

EXPERIENCE

RedCarbon S.r.l.

Remote

Tech Lead — Jan 2026 – Present

- Own the technical decisions across the whole platform, coordinating with the AI and security teams
- Build AI agents for threat detection and security review on a Go microservices platform
- Still writing code daily: the role is technical direction, not stepping back from engineering

Software Engineer — Sep 2022 – Dec 2025

- Designed and maintained Go microservices and the GCP/Kubernetes infrastructure behind them
- gRPC service communication, Next.js product frontend

Milkman Technologies S.p.A.

Remote

DevOps Engineer — Aug 2020 – Sep 2022

- Built and scaled high-availability, multi-tenant AWS infrastructure
- Kafka, PostgreSQL, Datadog; improved developer experience with CI/CD and ChatOps

ASEM S.r.l.

Verona, Italy

DevOps Engineer — Dec 2017 – Aug 2020

- Built the deployment pipelines and containerized legacy systems with Docker
- C# on the product side, Linux distributions on the infrastructure side

EDALab Networked Embedded Systems

Verona, Italy

Software Engineer — Nov 2016 – Sep 2017

- Embedded systems in C++ and Qt; ported a Qt application to iOS and shipped it

FREELANCE WORK

Sport Analytics S.r.l.

Remote

Cloud Architect — 2022

Moved the FantaCulo platform onto Kubernetes and designed its cloud-native infrastructure. A project I helped because I liked it.

Codemotion

Remote

IT Instructor — Jan 2021 – Apr 2021

Wrote and delivered the Infrastructure as Code, DevOps and Cloud Security modules of the Cloud Engineer career path.

Si-Fa Cooperativa Sociale

Verona, Italy

IT Manager — Oct 2019 – Dec 2021

Kept the infrastructure and website of a social cooperative running until it closed, alongside a full-time job.

Skills

Languages
Go, TypeScript, C#, C++

Platform
Kubernetes, GCP, AWS, Flux (GitOps), Pulumi, Docker, gRPC

Product
Next.js, React, PostgreSQL, Kafka

Practices
DDD, TDD, GitOps, CI/CD, Technical leadership

Education

Università degli Studi di Verona
B.Sc. Computer Science
94/110 · Dissertation: coaching application in Ionic with a NoSQL database
Oct 2014 – Mar 2018

Open source

Kubernetes, Capsule, Kannon

SELECTED TALKS

AI Won't Design Your System. You Have To.
reactjsday 2026

Securing Go for Production: Best Practices, Supply Chain, Testing
GoLab 2026

GreenOps: Bridging the Gap Between DevOps and Sustainability
WeAreDevelopers World Congress 2024

Gophers Gone Domain-Driven: a tale of Go and DDD
GoLab 2024

Full archive: 32 talks and appearances at davideimola.dev/sharing

EVENTS ORGANISED

Open Source Day — Florence, Italy
4 editions · 2023 – 2026

Meetups — Florence, Milan, Verona
10 meetups · 2023 – 2026

AI for Security Hackathon — Turin, Italy
2026

COMMUNITY & PROJECTS

Schrodinger Hat

Remote

Co-founder — Feb 2022 – Present

International open source community, 20k+ people reached across Europe, 100+ speakers hosted.

Argus

2026 – Present

Open-source AI security review agent written in Go. It runs real scanners (Semgrep, Gitleaks, OSV-Scanner), reads their findings, and reasons about them like an analyst would.
